PROJECTS

Trippie | Tour & Travel Management (FYDP)

Description: Trippie is a comprehensive travel management application designed to streamline the process of booking hotels, joining tours, viewing guide profiles and making appointments with tour guides. The application provides a seamless and user-friendly experience by integrating external services for payment processing and email notification.

- *Comprehensive hotel booking system - view hotel details, select rooms and make bookings with secure payment processing.*
- *Tour management and booking - view available tours, join tours and make payments with booking confirmation emails.*
- *Tour guide appointment scheduling - view guide profiles, book appointments and receive confirmation emails.*

Technologies: Express.js, Mongoose, Firebase, React.js, Tailwind CSS
Links: Live website | Client side | Server side

Contest Hub | Contest Creation Platform

Description: ContestHub is a dynamic and user-friendly Contest Creation Platform designed to foster creativity, engage communities and celebrate talent across various domains.

- *Role-specified dashboard for Admin, Contest Creator and Participant.*
- *User authentication with JWT for security.*
- *Stripe card payment to register for a contest.*

Technologies: Node.js, Mongoose, Firebase, React.js, Tailwind CSS
